ACTA TECHNICA

A JOURNAL OF THE HUNGARIAN ACADEMY OF SCIENCES

EDITORIAL BOARD

K. GÉHER, P. MICHELBERGER, J. PROHÁSZKA, T. VÁMOS

MANAGING EDITORS

P. CSONKA, GY. CZEGLÉDI

Acta Technica publishes original papers, preliminary reports and reviews in English, which contribute to the advancement of engineering sciences.

Acta Technica is published by

AKADÉMIAI KIADÓ

Publishing House of the Hungarian Academy of Sciences
H-1450 Budapest, Alkotmány u. 21.

Subscription information

Orders should be addressed to

KULTURA Foreign Trading Company
H-1389 Budapest P.O. Box 149

or to its representatives abroad

Acta technica is abstracted/indexed in Applied Mechanics Reviews, Current Contents-Engineering, Technology and Applied Sciences, GeoRef Information System, Science Abstracts.

To our Readers

This Index of Contents, of Authors and of Subjects covers volumes 81 to 100 of our Journal and is the continuation of the Index published in 1977. The Indexes of Contents and of Subjects contain the titles in the original language. The papers are listed in the Index of Contents in the order of their publication whereas the Subject Index groups them under English headings indicating the subject matters dealt with by the papers in the group.

1.1 Generalities

Preface 87, 3.

Book Review

AMMELBURG, G.: Konferencztechnik (Terplán, Z.) 86, 465.

1.2 Mathematics

BÉRES, E.: A Recent Method for the Numerical Solution of Engineering Problems, Part I. 94, 47.

BÉRES, E.: A Recent Method for the Numerical Solution of Engineering Problems, Part II. 94, 143.

CSONKA, P.: Numerical Method for the Approximate Solution of Technical Problems 98, 251.

DELEROI, W. — KOVÁCS, K.P.: Simple Mathematical Model for the Determination of External and Internal Magnetization Curves in an Induction Motor 100, 27.

ESZTERHÁS, S. — TERSZTYÁNSZKY, T.: Analysis of One-Hour Average Power Flows between Systems with the Probability theory 84, 281.

HANKÓ, Z.: Qualification of Interdependence or Independence Within Any Pair of Variables Involved in Multiple Linear Regression 99, 125.

HEGEDÜS, I.: Matrix Iteration Analysis of Rectangular Plates with Simply Supported and Free Edges 90, 151.

HENNYEY, Z.: Active Topology 83, 133.

HOLNAPY, D.: Applying Abstract Algebraic Structures to Structural Designing 91, 355.

JÁNDY, G.: Recognizing and Utilizing Heuristic Rules in the Problemsolving of Operations Research 85, 399.

JÁNDY, G.: Systemanalyse der zusammenhängenden Teilprozesse der Produktionsplannungs und Steuerung 84, 17.

JÁNOSDEÁK, E.: Erstellungsmethoden der Statistiker von Spitzenbelastungen 92, 245.

JANOSITZ, J.: Die Schätzung von Einfachen- und Doppelintegralen aufgrund geschichteter Probeentnahme 81, 249.

JARSKÝ, Č.: On Mathematical Stochastic Modelling and Optimization of Construction Processes 97, 177.

KALISZKY, S. — NÉDLI, P.: Analysis of Elasto-Plastic Structures using Mathematical Programming 83, 205.

KAMINSKY, V.A. — MAKAROV, V.I.: The Identification Method of a Dynamic System with a Known Structure 98, 317.

KURUTZ, M.: Computer Calculation of Frameworks Composed of Thin-Walled Open Sections 84, 269.

MICHELBERGER, P. — FUTÓ, P. — KERESZTES, A.: Analysis of Stresses Caused in Vehicles with the Aid of Statistical Methods 83, 93.

MISTÉTH, E.: Extremes and Confidence Intervals of Distribution Functions of Hydrologic Data Sets 83, 305.

- PÁCZELT, I.: Incremental Variational Principles in Contact Problems 96, 19.
- PÁCZELT, I.: Solution of Elastic Contact Problems by the Finite Element Displacement Method 82, 353.
- PALÁNCZ, B. — PARTI, M.: Digital Simulation of Multi-Component Drying 81, 65.
- PETHŐ, SZ.: The Error Functions and the Most Favourable Measuring Conditions for Mass Yield and Component Yield 85, 339.
- PETHŐ, SZ. — PATVAROS, J.: Mathematical Statistical Analysis of the Exploitability Functions 85, 29.
- POLINSZKY, K. — BÁTOR, B. — FÁY, GY. — FÜLÖP, J. — TÓRÖS, R.: A Logic Theory of Hazards and its Application to Combustion Processes 86, 237.
- POPPER, GY. — FERENCZI, M.: Numerical Method for Solving Eigenvalue Problems of Linear Vibration Systems of Finite Degrees of Freedom 84, 85.
- POPPER, GY. — GÁSPÁR, ZS.: Numerical Method for Solving Eigenvalue Problems of Lambda-Matrices of Degree 94. 103.
- POZUETA, M.A.R. — FEITO, J.S.: Finite Element Study of Linear Induction Motors with Discrete Winding and Slotted Stator 100, 239.
- RISTESKI, I.B.: Mathematical Method for Determination of Thermal Contact Resistance between Solidifying Metal and Mold 99, 333.
- SÁNDOR, I.: The "Discrete Lines" Method to Solve the two Dimensional Telegraph Equation 84, 141.
- SCHARLE, P.: An Example for constructing the Variational (Energetic) Error Principle 86, 395.
- SCHARLE, P.: On the Relationship between Different Approximating Methods 82, 53.
- SINGER, D.: An Efficient Computer Method for Optimal Control of Gas Networks 81, 449.
- SINGER, D.: A Suboptimal Solution for the Allocation of Controllers in Large Distribution Nets 93, 319.
- SINGER, D. — ELEK, J.: Algorithm for Determining the Near Optimal Centrum Locations in Large Graph Structures 98, 387.
- SINGER, D. — ELEK, J.: Software-Fragen der Analyse, Projektierung und Steuerung von Gasnetzen 87, 375.
- STÉPÁN, G.: Stability Investigation of Retarded Differential Equations 90, 109.
- SZABÓ, L.: Finite Element Analysis of Anisotropic Plastic Hardening 97, 315.
- SZABÓ, L.: Finite Element Method for Solving Elastoplastic and Elasto-Viscoplastic Problems 97, 283.
- SZENDY, K.: Planning of Optimal Investment Capacities for Inter-Connected Power Systems Using Probabilistic Constrained Programming 85, 241.
- TARNAI, T.: Generalization of Southwell's and Dunkerley's Theorems for Quadratic Eigenvalue Problems 91, 203.
- TARNAI, T. — KURUTZ, M. — POPPER, G.: Numerical Solution of Eigenvalue Problems with Eigenvalue Parameters in the Boundary Conditions 95, 149.

TERDIK, GY. — MICHELBERGER, P. — VÁRLAKI, P.: Estimation of Kernels for Discrete I/O Wiener-Volterra Models with Stationary Gaussian Input Process 100, 141.

VANCSA, Á.S.: Application of the Hopf Bifurcation Theory for the Dynamical Model of the Nose-Gear 97, 323.

VARGA, A. — ECSEDI-TÓTH, P. — MÓRICZ, F.: A Heuristic Method for Speeding up Manual Optimization of Boolean Functions 90, 247.

VÖRÖS, G.M.: General Method for Systematic Derivation of Variational Principles 89, 421.

Book Review

BOLOTIN, V.V.: Wahrscheinlichkeitsmethoden zur Berechnung von Konstruktionen (Mistéth, E.) 94, 237.

KENNETH, L.J.: Operations Research (Jándy, G.) 82, 472.

REINELT, G.: The Linear Ordering Problem: Algorithms and Applications (Vágó, I.) 99, 421.

1.3 Physics

BUKHARI, M.A.I.: Saturated Phase Enthalpy Relationships for Solid CO₂ in CH₂ at Cryogenic Phase Behaviour 91, 373.

GÁSPÁR, ZS. Generalization of Physical Networks 82, 87.

HENNYEY, Z.: The Theory of Relativity as Seen by the Engineer 90, 275.

KISS, T.: Dimensioning of Temperature-Compensated Silicon Pressure Gauges 89, 213.

KOVÁTS, Z.: Use of Maxwell Body in Gas Pressure Measurement by Means of Crusher 98, 367.

Book Review

EDELMANN, C.: Druckmessung und Druckerzeugung (Thamm, F.) 95, 165.

1.3.1 Mechanics

HERING, I.: Generalization and Some Applications of the Concept of the Ideal Constraint 90, 133.

MEGYERI, J.: Kinematische Kennwerte der Bewegung auf mit hoher Geschwindigkeit befahrenen Eisenbahngleisen 84, 315.

VAN DAC, Tran: On the Dynamics of a Man-Machine System 99, 249.

Book Review

PRINTED IN HUNGARY
Akadémiai Kiadó és Nyomda Vállalat, Budapest

NOTICE TO CONTRIBUTORS

Papers in English * are accepted on condition that they have not been previously published or accepted for publication.

Manuscripts in two copies (the original type-written copy plus a clear duplicate one) complete with figures, tables, and references should be sent to

Acta Technica
Münnich F. u. 7. í. 118
Budapest, Hungary
H-1051

Although every effort will be made to guard against loss, it is advised that authors retain copies of all material which they submit. The editorial board reserves the right to make editorial changes.

Manuscripts should be typed double-spaced on one side of good quality paper with proper margins and bear the title of the paper and the name(s) of the author(s). The full postal address(es) of the author(s) should be given in a footnote on the first page. An abstract of 50 to 100 words should precede the text of the paper. The approximate location of the tables and figures should be indicated on the margin. An additional copy of the abstract is needed. Russian words and names should be transliterated into English.

References. Only papers closely related to the author's work should be referred to. The citations should include the name of the author and/or the reference number in brackets. A list of numbered references should follow the end of the manuscript.

References to periodicals should mention: (1) name(s) and initials of the author(s); (2) title of the paper; (3) name of the periodical; (4) volume; (5) year of publication in parentheses; (6) numbers of the first and last pages. Thus: 5. Winokur, A., Gluck, J.: Ultimate strength analysis of coupled shear walls. American Concrete Institute Journal 65 (1968), 1029-1035.

References to books should include: (1) author(s) name; (2) title; (3) publisher; (4) place and year of publication. Thus: Timoshenko, S., Gere, J.: Theory of Elastic Stability. McGraw-Hill Company, New York, Toronto, London 1961.

Illustrations should be selected carefully and only up to the necessary quantity. Black-and-white photographs should be in the form of glossy prints. The author's name and the title of the paper together with the serial number of the figure should be written on the back of each print. Legends should be brief and attached on a separate sheet. Tables, each bearing a title, should be self-explanatory and numbered consecutively.

Authors will receive proofs which must be sent back by return mail.

Authors are receive 50 reprints free of charge.

* Hungarian authors can submit their papers also in Hungarian.
